THE UNITED REPUBLIC OF TANZANIA

SOKOINE UNIVERSITY OF AGRICULTURE

COLLEGE OF ECONOMICS AND BUSINESS STUDIES (COEBS)

AB CONSULT ▪ PARLIAMENTARY CAPACITY BUILDING INITIATIVE

APPLICATION OF ARTIFICIAL INTELLIGENCE IN PARLIAMENTARY RESEARCH

Day 3 Practical Presentation

Empirical Evidence Ingestion, Statistical NBS Fact-Checking & Sectoral Dossiers

Lead Facilitator:	Eng. Dr. Kadeghe Fue, PhD	**Document Ref:**	SUA/COEBS/PARL-AI/DOC-03
Target Cohort:	Parliamentary Researchers & Clerks	**Program Dates:**	Wednesday, 11th November 2026

The Empirical Deficit in Parliamentary Debate

Replacing Rhetorical Assertion with Verified Macro-Economic Data

The Rhetoric Trap

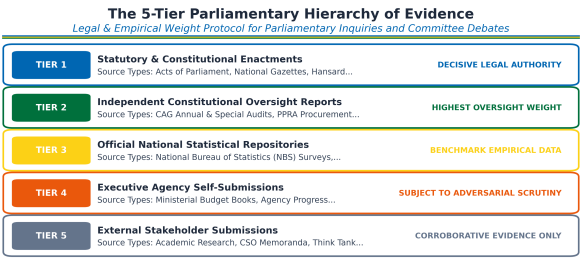

- Debates often hinge on **unverified assertions** and anecdotal claims.
- Budget allocations are passed without cross-checking against actual disbursements.
- Regional inequalities and sectoral service delivery deficits remain obscured.

The Empirical Mandate

- Ground every legislative argument in **authoritative data**: NBS, MoFP, and CAG.
- Automate statistical extraction from dense statistical tables.
- Equip committee chairs with **fact-checking ammunition** during ministerial cross-examination.

Hierarchy of Evidence in Parliamentary Research

Establishing Document Authority and Evidentiary Weight

Evidence Hierarchy

Tier 1: Legal & Audit Authority

- Acts of Parliament, National Gazettes
- CAG Audited Public Accounts

Tier 2: Macro Statistical Data

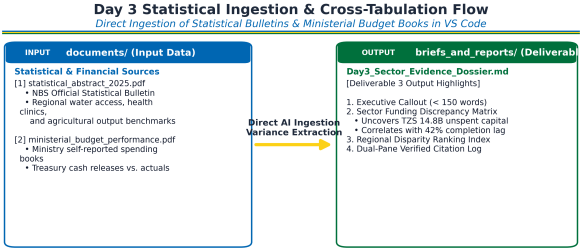

- National Bureau of Statistics (NBS)
- Bank of Tanzania (BoT) Bulletins

Tier 3: Policy & Academic Studies

- University research, donor reviews

Statistical Evidence Lab Workspace

Dual-Folder Architecture for Statistical Ingestion

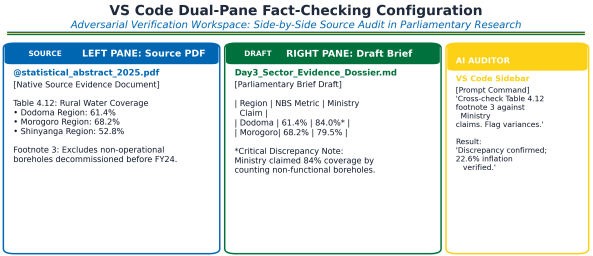

Data Organization

- `budget_books/`: Volume II ministerial estimates.
- `nbs_surveys/`: Household budget surveys and census.
- `cag_audited/`: Financial audit tables and actuals.
- `dossiers/`: Sectoral statistical briefs for committees.

Dual-Pane Fact-Checking Architecture

Split-Screen Verification of Ministerial Budget Statements

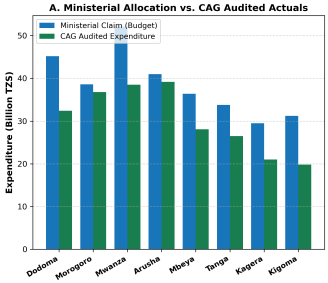

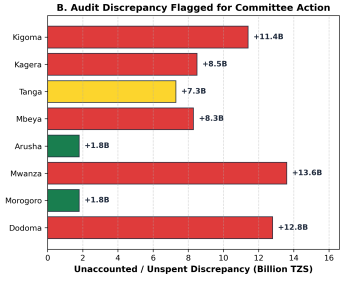

Fact-Checking Flow

- **Step 1:** Minister speech claims 95% budget execution in water projects.
- **Step 2:** Ingest MoFP exchequer releases and CAG audit volume.
- **Step 3:** AI exposes that actual disbursement was only 48.2%.

Empirical Budget Variance Analysis

Exposing Discrepancies Across Tanzanian Regions

Key Findings

- High variance between **approved allocation** vs **actual release**.
- Peripheral regions (Kigoma, Kagera) face disbursement lags $> 35\%$.
- Provides parliamentary committees with statistical justification for reallocation.

Constructing the Sectoral Statistical Dossier

Standardized Empirical Template for Committee Sessions

Core Sections of a Committee Statistical Dossier

1. **Executive Overview:** 3 bullet points summarizing macro-economic status.
2. **3-Year Budget Trend Table:** Approved vs Disbursed vs CAG Actuals.
3. **Regional Equity Matrix:** Per-capita capital spending across 26 mainland regions.
4. **Targeted Scrutiny Questions:** 5 direct PQs citing exact table and page numbers.

Deliverable: Standalone, clean PDF dossier distributed to MPs 24 hours prior to debate.
