The Non-Negotiable Mandate

Data Privacy, Institutional Sovereignty, and Ethical Verification

The Risks of Ungoverned AI

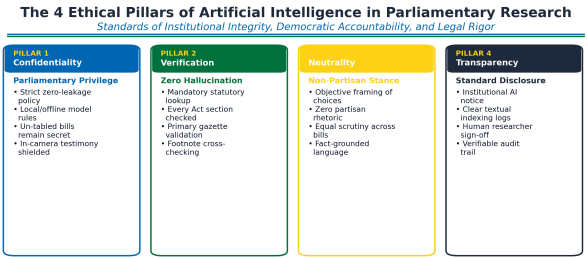

- Leaking **confidential government white papers** or draft cabinet bills to public LLMs.
- Accepting AI hallucinations without primary legal and statistical verification.
- Erode parliamentary sovereignty and public trust in legislative oversight.

The Ethical Guardrails

- **Sovereign Local Desks:** All processing conducted within private workspace folders.
- **Human-in-the-Loop:** AI proposes synthesis; parliamentary researchers verify and sign off.
- Compliance with Tanzania **Personal Data Protection Act 2022**.

Ethical AI Governance Pillars

Architectural Framework for Responsible Parliamentary AI

The 4 Guardrails

1. **Non-Disclosure & Privacy:** Zero sensitive data leakage.
2. **Evidentiary Traceability:** Every claim tied to exact clause/page.
3. **Non-Partisan Objectivity:** Unbiased multi-option evaluation.
4. **Sovereign Institutionalization:** Bunge-owned research assets.
